Subject: Data Base and Example Species Table Package

Marti,

Attached are most of the pieces (cover memo, generic Table X, and Mason's lilaeopsis table) of the "Conservation Strategy Data Base and Example Species Table" review package that we agreed would be included in the next mailing to ERWG. Not included are the conceptual diagram and the ERP Action Code Key, which I do not have in electronic format. I will bring you a hard copy of the whole package.

I'm assuming you will put the cover memo on CALFED letterhead. I changed all "3M strategy" or "mitigation measure" references to conservation strategies or measures in the cover memo and tables (generic Table X and the Mason's lilaeopsis example). You will need to have the Conceptual Diagram changed from Mitigation (3M) Strategies to Conservation Strategies.

Please be sure to add the following two people to the Conservation Strategy mailing list (they're not part of ERWG):

Terry Young
Environmental Defense Fund
5655 College Avenue, Suite 304
Oakland, California 94618

Bill Boyd
c/o EDF
same address as above.

Thanks

Tiki
